CHALLENGE: Tella Tool has earned the reputation of being one of the highest quality sources of precision metal products in the country. As part of an expansion project, their new Quality Control department had to match that level of quality through lighting.

SOLUTION: Tenesis eliminated all the fluorescent fixtures and upgraded them to our 2'x4' LED Flat Panel fixtures to achieve the highest level of light quality.

"Our experience has been good using Tenesis. We replaced florescent fixtures with LED ceiling panels and were impressed with the added light they supplied."
